

ACTIVITY 1

10 MIN

Complete the function body :

To return the movies created between the start year to the end year

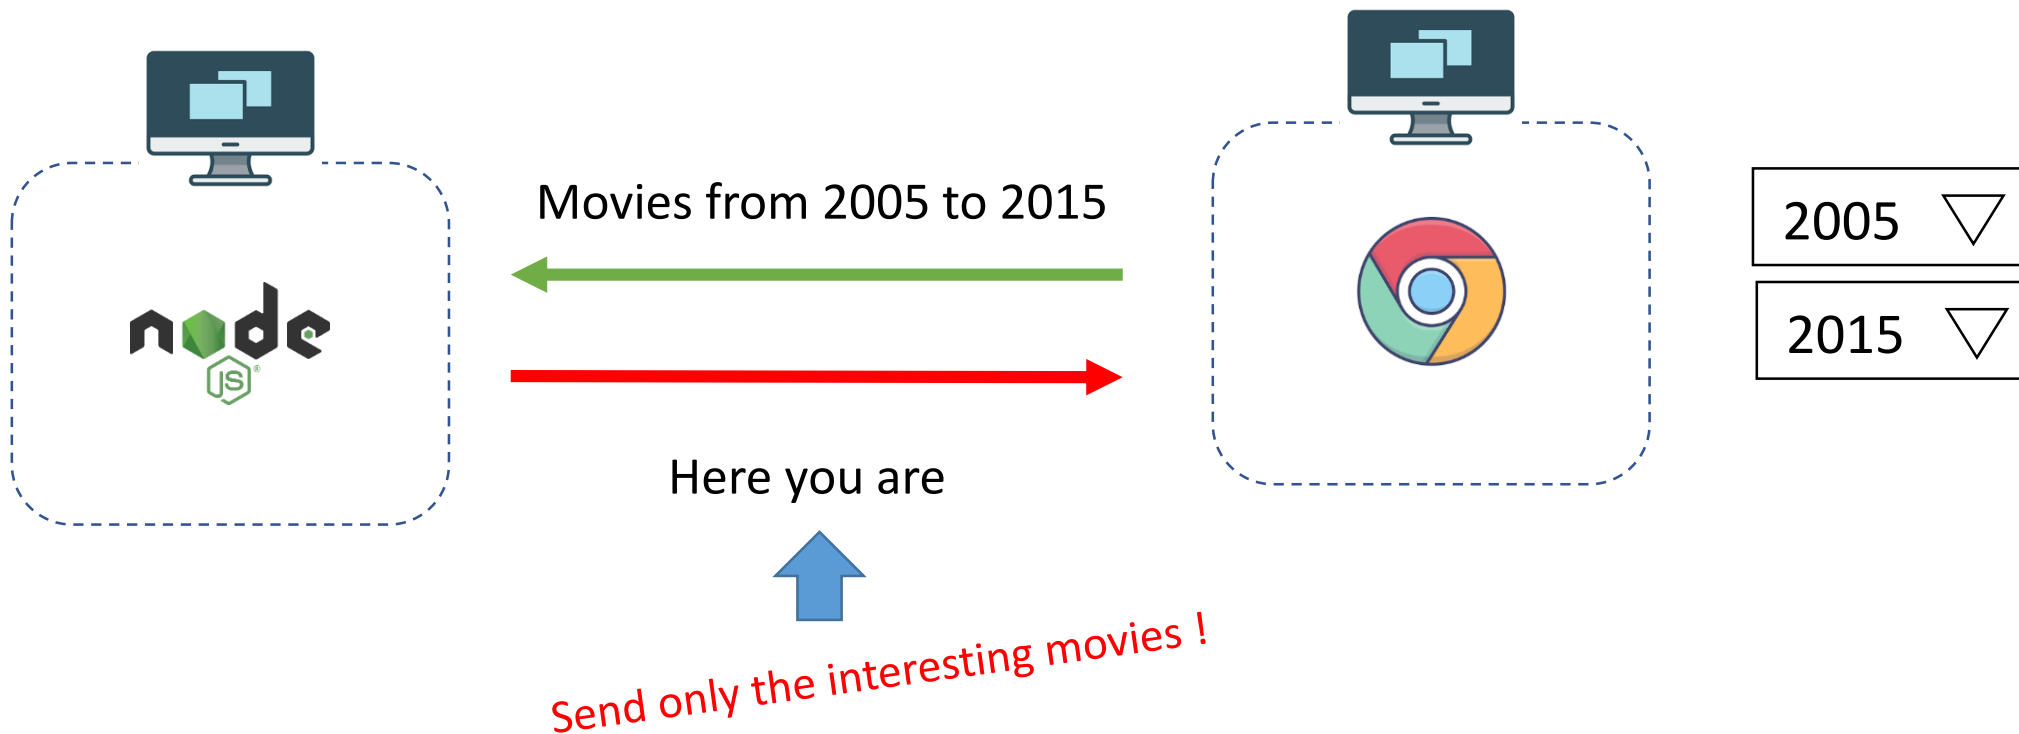

```
getMovies(startYear, endYear)
```

ACTIVITY 2

10 MIN

Complete the code to request the movies
From the **start date** to the **end date**

ACTIVITY 3

10 MIN

Complete the code to send a 401 error
with a message 'wrong date'
If the start date is less than 2015

400 Bad Request - This means that client-side input fails validation.

401 Unauthorized - This means the user isn't not authorized to access a resource.

403 Forbidden - This means the user is authenticated, but it's not allowed to access

404 Not Found - This indicates that a resource is not found.

```
res.status(410);
```

... and update the front to get this error
and display the message

ACTIVITY 4

10 MIN

Fix the code of the LOGIN request

To send only TRUE/FALSE :

- True if login is valid
- False if login is NOT value
